Together.

Electroneurophysiology Technologist II

Location: Calgary, Alberta, Canada

Requisition #: ALB00449302

Salary Range: \$38.39 - \$49.34 per hour

Job Type: Regular Full Time

Your Opportunity:

You're analytical, detail-oriented, and are comfortable with highly specialized and technical equipment. Able to identify patterns and anomalies, you can advise physicians and other health professionals on what you see and advise them appropriately. Alberta Health Services is now seeking such a person with the right qualifications for the role of Electroneurophysiology Technologist II, or EEG Tech in the outstanding City of Calgary!

As an Electroneurophysiology (EEG) Technologist within the Calgary Zone Adult Neurophysiology Program, you will be primarily stationed at Calgary's South Health Campus, one of Calgary's major hospitals. As needed, you will provide EEG support at the Rockyview General Hospital, another major medical centre which treats nearly 220,000 patients annually. Both facilities are exceptional full-service hospitals with a wide range of specialities.

Calgary has been ranked the 5th most livable city globally and is recognized as one of the world's cleanest cities. With local universities doing groundbreaking health research, shopping, dining, the arts, professional sports, and entertainment, there's something for everyone in Calgary!

AHS is a key part of Alberta's province-wide health system and a national leader in many areas of healthcare. The organization is recognized as a top employer nationally and provincially, as well as a top employer for young people and diversity. It is an exciting time to be a change leader within AHS, as healthcare administration and delivery across Alberta evolves to deliver on the mission of an accessible, sustainable health system for all Albertans. Come work for a supportive employer with competitive pay, comprehensive benefits, and opportunities for growth.

There are three positions available.

Description:

As an Electroneurophysiology (EEG) Technologist, you will determine which ENP tests to perform based on clinical history, findings, and protocols. You will provide feedback to

surgeons for early detection of intraoperative injury, allowing for immediate corrective measures and will resolve unusual or complex cases referred by the EEG Technologist I's or refers them to the appropriate individual(s) You will implement, maintain and assess approved quality control procedures. You will participate in the recruitment and selection of staff and coordinate the orientation of new employees. You will also provide technical and problem solving advice to other EEG Technologists.

Required Qualifications:

Active or eligible for registration with the Alberta College of Medical Diagnostic and Therapeutic Technologists (ACMDTT).

Additional Required Qualifications:

Graduation from a formal electrophysiology program, or equivalent training. Successful completion of Canadian Board of Registration of EEG Technologists (CBRET) examinations or equivalent in addition to either successful completion of the Board of Registration of Electromyography of Canada (BRET) examinations or successful completion of the Certification Examination in Neurophysiologic Intraoperative Monitoring (CNIM). English language fluency to meet ACMDTT policy. Current CPR certification. Proven leadership, teamwork, and time management skills. Exceptional communication skills. Ability to handle the physical requirements of the job: prolonged sitting/standing, pushing/pulling of equipment, assisting with patient transfers, sustained awkward postures involved in day-to-day work activities.

Preferred Qualifications:

Minimum 3-5 years' work experience in a Clinical Neurophysiology Lab. ACMDTT ictal SPECT injection enhanced practice authorization desired. EMG experience preferred.
